## Prefatory Note

ART INDEX is an author and subject index to domestic and foreign art periodicals and museum bulletins. Subject areas indexed include archaeology, architecture, art history, arts and crafts, city planning, fine arts, graphic arts, industrial design, interior design, landscape design, photography and films, and related fields.

The Committee on Wilson Indexes of the American Library Association's Reference and Adult Services Division advise the publisher on indexing and editorial policy by means of in-depth contents studies conducted at intervals of several years. The Committee as part of its study prepares a list of periodicals, representative of all subject areas included in the Index, for consideration by the subscribers.

Selection of periodicals for indexing is accomplished by subscriber vote. In voting their preferences subscribers are asked to place primary emphasis on the reference value of the periodicals under consideration. They are also asked to give particular consideration to subject balance in order to insure that no important field be overlooked in proportion to overall index coverage.

Suggestions for additions or deletions of titles should be brought to the attention of the Committee in care of The H. W. Wilson Company.

## Acknowledgment

In addition to the staff members whose names appear on the title page we wish to acknowledge the contribution of Bertrun Delli to this volume.

## Explanatory Notes

Volume 25 initiates a number of editorial changes over the permanent volumes of previous years. These have been incorporated in the following notes of explanation.

### ARRANGEMENT

Author and subject entries are listed in one alphabet. No title entries are made. Division of major subject headings (such as **ART**) are filed within the following sections: (1) General subdivisions (**ART—Themes**), (2) Chronological subdivisions (**Art—17th century**), (3) Geographical subdivisions (**ART—Spain**), (4) Inverted headings (**ART, Italian**), (5) Phrase headings (**ART and state**).

### BOOK REVIEWS

Following the main body of the index, there is a listing of citations to book reviews.

### HEADINGS

Firm names used as headings in this volume are listed under one of the following subject headings: **ARCHITECTURAL** firms and groups, **DESIGN** firms and groups, **INDUSTRIAL** design firms and groups, **INTERIOR** design firms and groups, **LANDSCAPE** architecture firms and groups, and **PLANNING** firms and groups.

Beginning with this volume, the subheading, **Influence**, has been added under the name of a person in order to show his influence on others. The subheading, **Influence**, may also appear under a specific subject heading describing, e.g. the influence of a school of art on an artist or artists. The subheadings, **Influence—Reproductions**, may be found under the name of an artist for works after the artist, for works showing stylistic influences of the artist, etc.

The names of all private collections used as subject headings are listed under the heading, **ART—Collections**. Headings divided by **Colonial** have also been subdivided by nationality for the first time, e.g. **ARCHITECTURE, Colonial—American**

### ARTICLE TITLES

All titles or parts of titles which have been supplied are enclosed in brackets.

### ILLUSTRATIONS

Works of art (up to ten) are listed in a note only after the artist entry when illustrations accompany an article. If the number of illustrations of an artist's work in an article exceeds ten and if they are not itemized, the number of illustrations is given in the entry under the artist's name, e.g. 15 il. Beginning with this volume, illustrations of anonymous works of art within articles may be found listed under appropriate subject headings with the subheading, **Reproductions—Anonymous works**. Illustrations of decorative works of art may be found listed under the name of the craftsman or designer with the subheading, **Reproductions**.

## EXPLANATORY NOTES

### REFERENCES

*See* references lead from terms not used as headings to those under which entries are to be found. *See also* references lead to related subjects. Cross references are made to inverted headings from the uninverted form. For example, it is possible to find all headings subdivided by "French" by consulting the cross references beginning "French," e.g. "French bronzes. *See* Bronzes, French."
